Hoang Dung Le Duy

Fresher Fullstack Developer

(+84)395081725 leduyhoangdung6i@gmail.com 07/09/2003 Hanoi, Vietnam

EDUCATION

FPT University 9/2021 - 9/2025

Software Engineer

Bachelor's Degree - Good classification

WORKING EXPERIENCE

PiraGo Company 04/2024 - 09/2024

Intern

- Explored and applied core concepts of PHP, React, Next.js, Node.js, and NestJS as part of internship training
- Enhanced understanding of both backend and frontend frameworks through hands-on project work
- Gained experience with full-stack development workflows and modern web technologies

FPTU Smart Lab 01/2025 - 11/2025

Member

- Developed and maintained website projects from planning to deployment using modern web technologies
- Actively participated in administrative and technical support for school competitions and examination processes
- Contributed to the USB EOS System ensuring stable exam environments for students

Anothemes Company 12/2025 - 06/2026

Developer

- Developed full-stack web applications leveraging JavaScript/TypeScript ecosystems across frontend layers
- Contributed to mobile app development using Flutter, delivering responsive and user-friendly interfaces
- Worked collaboratively in an agile environment to deliver features on schedule and maintain high code standards

SKILLS

Programming	JS, TS
Library/Frameworks	ReactJS, NodeJS, NextJS
Database	MongoDB, MySQL, SQL Server, PostgreSQL
Others	Docker, Git, Google APIs,...

PROJECTS

USB EOS System 01/2025 - Present

Role: Support Team

Description: Contributed to the success of FPT University's final exams by providing a USB boot–based solution that enhanced system stability and improved the student testing experience.

FPT Learning Workspace for Student 04/2026 - 05/2056

Role: Frontend Developer

Website: https:tramhoc.fpt.edu.vn

Team size: 2 members
Description:Pomodoro Focus Space — A study workspace app featuring a Pomodoro timer, customizable backgrounds and ambient music, and a live countdown to Vietnam's National High School Graduation Exam, helping students stay focused and motivated throughout their study sessions.
Technologies: NextJS, PostgreSQL, Docker
Contribution: Developed and optimized frontend components using Next.js with TypeScript, implemented the Pomodoro timer logic and to-do list feature, integrated YouTube embed and media customization (background images, videos, and ambient music), and ensured a responsive, distraction-free UI across devices.

TeeCraft 9/2025 - 11/2025

Role: Frontend Developer

Website: https://teecraft.com.vn
Source code: https://gitlab.com/hdung7903/teecraft-fe
Team size: 5 members
Description: Developed a web-based e-commerce platform for custom T-shirt design and ordering, featuring an intuitive product customization interface and streamlined checkout process.
Technologies: .NET, NextJS, MySQL, Docker
Contribution: Built and optimized frontend components using React with TypeScript, integrated REST APIs for product management, and ensured responsive UI across devices.

FutureMe 05/2025 - 08/2025

Role: Frontend Developer

Website: https://futureme.com.vn
Source code: https://gitlab.com/hdung7903/future-me-fe
Team size: 5 members
Description: Built an online education platform that enables students to take SAT practice tests and connect with tutors offering suitable courses and classes, with features for progress tracking and personalized learning recommendations.
Technologies: Java Spring Boot, React (TypeScript), MySQL, MongoDB, Docker
Contribution: Developed frontend architecture, implemented test-taking interface with timer and progress tracking, and built tutor-student matching UI.

AI-Edu – Educational Platform with Test Generation & Chatbot Support 01/2025 - 02/2025

Role: Frontend Developer

Source code: https://github.com/glucoseck007/ai-edu
Team size: 3 members
Description: Developed an AI-powered educational platform featuring automated test generation and chatbot support for Vietnamese students, enabling interactive learning experiences with intelligent content delivery.
Technologies: React, Java Spring, Python FastAPI

Connectify – Social Networking Platform (Facebook Clone) 09/2024 - 11/2024

Role: Fullstack Developer & Team Lead

Source code: https://github.com/hdung7903/connectify
Team size: 5 members
Description: Led the development of a full-featured social networking web application replicating core Facebook functionalities, including blog posting, friend management, and real-time messaging using WebSocket. Oversaw both frontend and backend implementation to ensure seamless UX and system performance.
Technologies: Node.js, React.js, MongoDB

Attendance System – Academic Portal Clone 01/2024 - 03/2024

Role: Fullstack Developer

Source code: https://github.com/hdung7903/swp-att-g4
Team size: 5 members
Description: Developed a web-based academic portal replicating the FPT University system, featuring modules for attendance tracking, teacher management, class scheduling, and course administration.

Technologies: JSP Servlet, MySQL, Bootstrap
